Ref : Public Comment on Draft MERC (Transmission Open Access) Regulations 2013 & Draft MERC (Distribution Open Access) Regulations 2013 vide your notice on web site.

Sub : Suggestions to include Connectivity using open access of Small capacity solar generation plants from 10 KW onwards at 415 V

Respected Sir,

Pl accept my apologies for responding late to this public notice. I have come across your notice only today responding immediately. Thought this suggestion is beyond the stipulated time, I would sincerely request you to go thro same and incorporate suitably as this is not only in public interest but the interest of electricity companies also.

My Background : I am BE by qualification from Nagpur University (1980 batch), a independent entrepreneur who has worked with a local company for 8 Yrs & was involved in manufacture of Control and also licensed electrical contractor. Then started my own company " Business Algorithms P. Ltd" where I work as Director since last 25 Yrs. We have recently diversified in Solar Power Business and I have myself visited and surveyed more than 90 customers in Vidarbha, studied their requirements and my suggestions are based on the same.

My suggestions are enclosed here with and request you to consider the same & give me a chance to appear in public hearing and explain the same & consider with appropriate modifications for incorporation in the above said regulations.

Thanking you

Yours truly

Sudhir Budhay
